EDUCATION

GL Bajaj Institute of Technology & Management **2024 - 2027**
B.Tech in Artificial Intelligence & Machine Learning **CGPA: 7.66**

Quantum University, Roorkee **2021 - 2024**
Diploma in Computer Science & Engineering **76.60 %**

WORK EXPERIENCE

Indian Institute of Computing and Technology (IICT) **June 2026 – July 2026**

Artificial Intelligence & Machine Learning Intern **Remote**

- Developed Machine Learning models using Python achieving **over 90%** prediction accuracy on sample datasets, applying data preprocessing, feature engineering, model training, and model evaluation techniques.
- Performed Exploratory Data Analysis and Processed datasets containing **10,000+ records** using Pandas and NumPy, and Scikit-learn to analyze real-world datasets and build predictive models.
- Applied supervised learning algorithms, data visualization, and predictive analytics to solve practical AI problems enhancing analytical and problem-solving skills.

PROJECTS

Heart Disease Detection System **GitHub**

- Developed a machine learning-based healthcare platform using Python, Flask, Scikit-learn, Pandas, and NumPy to predict heart disease risk from patient health data with real-time prediction capabilities.
- Implemented **data cleaning, data preprocessing**, feature selection, exploratory data analysis (EDA), data visualization, and classification algorithms to improve prediction accuracy.
- Deployed the machine learning model using **Flask REST API**, enabling real-time disease prediction through a responsive web application with HTML, CSS, and JavaScript, providing AI-powered disease prediction and an intuitive user experience.

Medicare: Online Doctor Appointment Booking Website **GitHub**

- Developed a full-stack Hospital Management System using HTML, CSS, JavaScript, PHP, and MySQL with secure authentication, CRUD operations, REST API integration, and appointment scheduling.
- Created Patient, Doctor, and Admin dashboards to **manage appointments, patient records, doctor details**, and hospital services.
- Designed a responsive website with doctor search, appointment scheduling, and hospital information, providing an intuitive user experience across desktop and mobile devices.

TECHNICAL SKILLS

Languages: Python, C/C++, SQL
Frontend: HTML5, CSS3, Bootstrap, Tailwind CSS, React.js
Backend: Flask
Database: MySQL
AI/ML: Pandas, NumPy, Matplotlib, Hugging Face, Prompt Engineering, LLM Integration
Developer Tools: Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Linux Commands, Wireshark, IntelliJ IDEA
Relevant Coursework: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Computer Networks (CN), Cloud Computing.

PROFESSIONAL SKILLS

• Communication • Teamwork • Problem Solving • Time Management • Adaptability • Leadership

ACHIEVEMENTS

- Solved coding problems on LeetCode and Geeks for Geeks
- Built Machine Learning projects
